ABOUT NIOTEC

HAMBURG HQ

NIOTEC is a service partner for technical ship, industrial and offshore equipment and a service partner for alternative solutions in technical project management.

GROWTH

NIOTEC stands for innovation, quality and sustainable growth. Since our founding, we have continuously expanded our market position, acquired new customers, and successfully broadened our product portfolio.

GLOBAL

NIOTEC operates successfully internationally and serves customers in numerous countries worldwide. With strong partners in local locations and a global network, we combine regional proximity with international expertise.

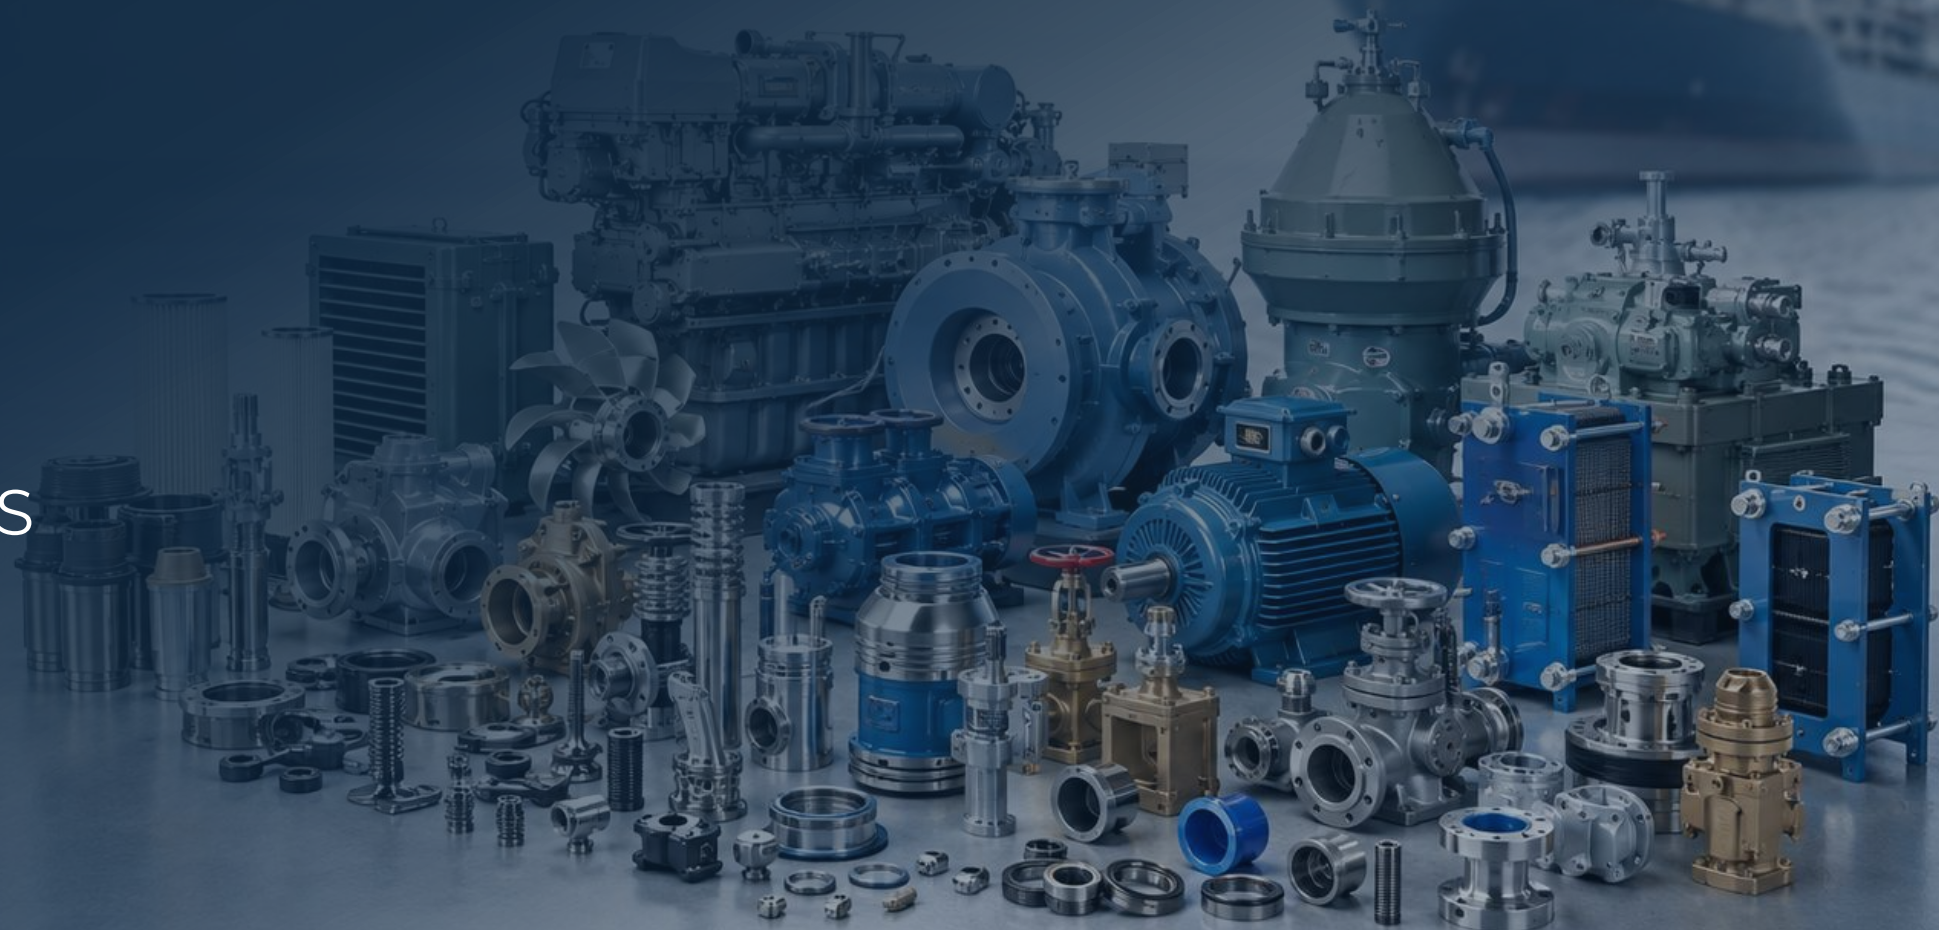

OWN DESIGNS

Aside from technical spares and complete units, NIOTEC also has own products in the portfolio which have been widely used in the industry. Products such as composite pump impellers with a substantial longer life time.

SPAREPARTS

DIESEL ENGINES

NIOTEC specializes in the distribution of high-quality main and aux. engine components for the maritime industry.

Thanks to our excellent and long-standing relationships with leading manufacturers worldwide, we can offer our customers reliable original parts and tested replacement components.

Our partners have decades of experience in marine engine manufacturing and stand for the highest quality, precision, and operational reliability.

... AND MORE

PUMPS

One of NIOTECS core businesses is the worldwide distribution of pumps for all applications on board ships. We offer all pump types in all sizes – for every medium and every operating requirement.

Thanks to our excellent and long-standing relationships with renowned manufacturers with decades of experience and a database with over 3.000 pump types, we guarantee the highest quality, reliability, and technical expertise. Furthermore, we develop and manufacture our own pump designs.

ADDITIONAL SYSTEMS

ELECTRO MOTORS

Electrical motors are essential to a vast group of components on board. Therefore, NIOTEC has a large stake in the distribution of electric motors for use on board ships. In addition to complete electric motors, we also supply all spare parts and components and offer professional repair and maintenance services.

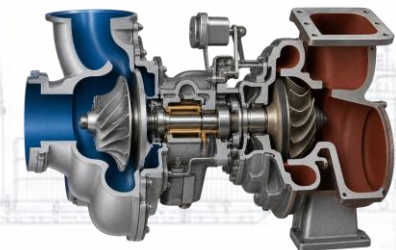

AIR COMPRESSORS

Compressor systems are essential for starting machinery and for the reliable operation of a wide variety of pneumatic tools and systems. This is why NIOTEC has implemented compressor units into the portfolio of products. We offer complete compressor systems as well as all spare parts and components, ensuring long-term operational reliability.

TURBO CHARGERS

Turbochargers are essential for the efficiency and performance of main and auxiliary engines on board ships. While regular maintenance and cleaning can extend their service life, they are often insufficient to ensure consistently reliable operation. That's why we offer fast delivery of turbocharger spare parts and complete turbocharger assemblies.
